

MIKE ALLAFFI

Junior Software Developer • React Native & Web Developer

Naqqache, Lebanon | +961 78 919 757 | mikelaffe@gmail.com | github.com/mikelaffe09 | smartgarage.website
mikeallaffi@outlook.com

PROFILE

Computer Science student focused on frontend, mobile, and practical full-stack development. Builds deployed products using React, React Native, TypeScript, ASP.NET Core, Supabase, Python, and AI/RAG workflows. Combines hands-on software projects with real operations experience in coordination, client follow-up, and workflow management.

TARGET ROLES

- Junior Software Developer
- Frontend / Web Developer
- React Native Developer
- Backend Developer

TECHNICAL SKILLS

Programming TypeScript, JavaScript, Python, C#, C++, SQL, HTML/CSS	Frontend / Mobile React, React Native, Expo, Tailwind CSS, Vite, responsive UI
Backend / API ASP.NET Core, FastAPI, REST APIs, Swagger, API integration	Database Supabase, MySQL, authentication flows, data modeling basics
AI / Data RAG, embeddings, Pinecone, OpenAI API, Pandas, NumPy, Scikit-learn	Tools / Deployment GitHub, VS Code, Visual Studio, Netlify, Railway, ClickUp

FEATURED PROJECT

SmartGarage | AI Vehicle Management System | Senior Project | Group of 2

Role: Frontend (mobile/web), backend API development, admin dashboard, and AI/RAG integration

Live: smartgarage.website

Stack: React Native, Expo, React, TypeScript, ASP.NET Core, Supabase, Python, FastAPI, Pinecone, OpenAI API, Netlify, Railway

Product & Frontend

- Built mobile and web interfaces for vehicle profiles, reminders, expenses, maintenance recommendations, profile flows, and authentication.
- Designed admin dashboard workflows to support user, vehicle, document, and AI activity management.

Backend & AI

- Integrated Supabase data/authentication with ASP.NET Core REST APIs and deployed services across Railway and Netlify.
- Helped build a RAG-based AI mechanic assistant using document embeddings, vector search, and OpenAI API responses.

Personal Portfolio Game | Interactive Developer Portfolio / CV

Link: www.mikeallaffi.com

Stack: React, TypeScript, Vite, Kaboom, GSAP, CSS, Netlify

- Built an interactive portfolio experience with a playable game hub, unlocked sections, project case studies, and recruiter-friendly portfolio mode.
- Added responsive mobile controls, accessible modal behavior, local progress tracking, reduced-motion support, and clean deployed presentation.

SELECTED PROJECTS

ChapterKeep | Book Tracking Web App

Link: chapterkeep.cresvia.co

Stack: React-style web app, responsive UI, deployed web experience

- Created a responsive reading-progress app with book tracking, collections, progress views, and dashboard-style insights.
- Focused on clean UI, user flows, landing-page structure, and polished deployed presentation.

Cancer Death Rate Prediction | Machine Learning / Data Analysis

Stack: Python, Pandas, NumPy, Scikit-learn, Matplotlib

- Analyzed public health data using Python, Pandas, NumPy, Matplotlib, and Scikit-learn.
- Prepared datasets, trained regression models, evaluated performance, and visualized relationships in the data.

Selected Web Work | Business Websites & Landing Pages

Links: cresvia.co | cresvialb.com

- Designed and deployed responsive websites and landing pages for service-oriented brands, emphasizing messaging, layout, responsiveness, and conversion-focused presentation.

EXPERIENCE

Unity Management | Project Manager | Remote | Dec 2023 - Present

- Manage facility-maintenance workflows, including client onboarding, client retention, vendor hiring, technician dispatching, scheduling, and job follow-up.
- Coordinate around 80 work orders per month while maintaining visibility across client requests and technician updates through ClickUp.
- Apply structured project management habits that translate directly into software delivery: task ownership, clean handoff, documentation, prioritization, and follow-through.

Facilitate | Project Coordinator | On-site | Sep 2022 - Aug 2023

- Coordinated maintenance work orders through a custom CRM and ClickUp, including dispatch, data entry, scheduling, technician follow-up, and client communication.
- Handled around 55 work orders per month while developing strong communication, problem-solving, and remote task-tracking skills.

Gilgamesh Restaurant | Waiter & Cashier | Jun 2016 - Sep 2019

- Handled customer service, cash transactions, and daily restaurant operations in a fast-paced environment.

EDUCATION

Notre Dame University (NDU) | Bachelor in Computer Science

2023 - Expected 2026

- Relevant coursework: Data Structures, Database Systems, Software Engineering, Artificial Intelligence, Operating Systems, and OOD.

Saint Joseph University of Beirut (USJ) | Electrical Engineering Coursework
| 2019 - 2022

Saint Rita School | General Science | 2019

COURSES

- Web Development Bootcamp - Angela Yu (Udemy)
- Self-directed React, JavaScript, and Python ML/deep learning study

LANGUAGES

- Arabic - Native
- English - Fluent
- French - Professional
- Spanish - Basic
